SUMMARY

Senior PM with 6+ years building and validating AI-native products and data platforms across fintech, logistics, and healthcare. Architected production RAG pipelines with hands-on fluency in LLM evaluation, prompt engineering, embeddings, and responsible AI governance. Proven at running rapid discovery cycles, translating complex AI capabilities and ambiguous business problems into intuitive, high-impact products.

BUSINESS EXPERIENCE

AI Product Manager (Part-time) @ AgileCatalyst.ai | *Remote* Jul 2025 - Present

- Architected 5-stage Hybrid RAG pipeline with hands-on prompting strategies and continuous evaluation pipelines; achieved MRR 0.12 to 1.0, 42ms retrieval latency, under 1.2s end-to-end response; designed AI governance including faithfulness scorer, context window guard, and cost spike alerts.
- Built 0 to 1 AI-native investment platform serving institutional investors across 100+ companies under GCC fintech regulatory constraints; bridged investment operations and engineering; owned infrastructure decisions including vector store selection, async orchestration, and database architecture.
- Designed user-facing AI experience for investment analysts; implemented streaming response rendering, contextual source attribution, suggested query prompts, and structured table rendering for financial data -- translating complex AI outputs into intuitive, trust-building interfaces.

Senior Product Manager @ Nurdsoft | *Remote* Sep 2023 - Jun 2026

- Architected multi-tenant B2B SaaS platform for a 3PL enterprise client; designed data isolation, RBAC, API governance, and observability across 11+ platform services on GCP supporting 7 user personas and 100K+ shipments annually.
- Owned product end-to-end across shipment request, tracking, dispatch, and compliance workflows; defined KPIs using usage data and customer feedback to drive prioritization; improved tracking accuracy from 70 to 95% and delivered \$500K+ compliance savings per client with zero unplanned downtime.
- Leveraged AI to accelerate workflows using Claude and Cursor daily; built functioning prototypes capturing intricate multi-persona workflows cutting design-to-handoff time by 50%; shipped AI-powered manifest scraping tool reducing operations processing time by 20%; engineering velocity increased from 12 to 20+ SPs per developer per sprint.
- Built platform extensibility layer with REST APIs, webhooks, and SDK patterns; established API versioning and backward compatibility frameworks protecting third-party integrations; partnered with engineering, design, and operations from discovery through delivery; mentored junior PMs and interns on product fundamentals, prioritization frameworks, and stakeholder communication.

Product Manager @ Eze Castle Integration | *Boston, USA* Feb 2021 – Jan 2023

- Delivered 40+ iOS/Android whitelabel applications for union workers across US and Canada on ECI's platform; conducted 30+ user interviews identifying friction points; redesigned onboarding, engagement, and retention flows increasing completion rate from 60 to 95%, driving DAU from 20K to 50K (+150%) and downloads to 200,000+.
- Built measurement foundation with GCP data warehouse (300+ dimensions) enabling real-time dashboards and data-driven experimentation across the platform.

Data Analyst / Product Manager @ Aaron E. Henry Health | *Clarksdale, USA* Aug 2018 – Jan 2021

- Managed medical billing operations and EHR integrations; worked with healthcare data standards (CCD, ICD-10, CPT) to optimize revenue cycle, reduce claim denials, and improve collections; maintained strict compliance and data governance accountability throughout.
- Built cross-department analytics infrastructure in HIPAA-regulated environment using SQL and Tableau; queried 10,000+ patient population datasets across clinical, billing, compliance, and finance; developed dashboards tracking patient flow, revenue cycle metrics, and operational performance.

Business Intelligence Analyst Intern @ Atos | *Dallas, USA* Jun 2017 – May 2018

EDUCATION

M.S, Business Analytics – *The University of Texas at Dallas, USA (2018)*

B.E, Mechanical Engineering – *Rajiv Gandhi Proudyogiki Vishwavidyalaya, India (2016)*

CERTIFICATIONS

Certified Scrum Product Owner (CSPO) – *Scrum Alliance* | **Generative AI for Product Managers Specialization** – *IBM*
|Product Management: Building AI-Powered Products – *IBM* | **AWS Certified Solutions Architect Associate 2020** – *A Cloud Guru* | **Querying Data with SQL** – *Microsoft*

TECHNICAL SKILLS

- **AI/ML:** RAG pipelines, MCP, LLM model evaluation & selection, conversational AI design, prompt engineering (hands-on), Claude Code (daily), Cursor (daily), LLM evaluation frameworks (MRR, latency, accuracy, cost-per-query), embeddings, retrieval architectures, model provider integrations, AI cost & capacity planning, AI-powered prototyping
- **Platform/Infrastructure:** REST APIs, API design, microservices, e-commerce, web technologies, multi-tenant architectures, RBAC, monitoring frameworks, data isolation, CI/CD, GCP, AWS, Docker, FastAPI, Qdrant, OAuth, OIDC, CDP, SSO, first-party data, behavioral data pipelines, unified profile, segmentation, activation.
- **Finance & Payments:** Stripe payment integration, financial workflows, payment systems, accounting operations, payment processing
- **Analytics & Data:** SQL, BigQuery, Tableau, Excel (advanced), A/B testing, metrics instrumentation, PostHog
- **Product:** Jira (daily), Linear, Notion, Figma, 0→1 product building, end-to-end ownership, cross-functional collaboration, stakeholder alignment
